PROFESSIONAL SUMMARY

Technical product, software and blockchain governance professional with experience turning ambiguous ecosystem and user needs into structured problem statements, technical requirements and decision ready documentation. Co-authored CPS-0033 and worked through a 29 commit public GitHub review cycle, triaging feedback, identifying gaps, narrowing scope and iteratively reframing a complex technical problem. Brings end to end software product ownership, stakeholder research, proposal analysis and cross functional delivery experience, with a strong track record of synthesising messy input into clear documentation and moving work from problem definition towards execution.

PRODUCT, STANDARDS & BLOCKCHAIN EXPERIENCE

CPS-0033: DRep Voting Power Concentration | Co-author

Cardano Improvement Proposals Repository | 2026

- Co-authored a formal Cardano Problem Statement, turning governance research, stakeholder interviews, workshops and ecosystem feedback into a structured, solution agnostic technical problem definition.
- Worked through a 29 commit public GitHub review cycle, triaging editor feedback, identifying gaps, narrowing scope and substantially reframing the document around ledger rules, CIP-0119 metadata, wallet behaviour and explorer behaviour.
- Managed iterative revisions across scope, structure, technical references, Markdown, review comments and standards process requirements through triage and merge.
- Synthesised complex technical and community input into clear documentation that editors and ecosystem contributors could review and act on.

Community Governance Research Consultant

Input Output Global | Remote | Sep 2025 to Sep 2026

- Synthesised stakeholder interviews, workshops, surveys and on chain data into structured findings, recurring themes, open questions and decision relevant insights.
- Conducted stakeholder interviews and translated qualitative and quantitative input into concise analysis for technical and governance audiences.

Lead Developer & Project Manager

Maxwell Technologies | Douala, Cameroon | Jan 2023 to Dec 2024

- Led client facing software delivery, translating business problems and requirements into scoped technical work for a 12 person engineering team.
- Coordinated priorities across concurrent software projects, connecting client needs, engineering constraints and delivery decisions.
- Delivered 12 revenue generating applications valued at \$180,000 while improving delivery time by 25% and code quality by 30%.

Koki | Founder & Independent Product Developer

kokiafrique.com | 2026 to Present

- Took a bilingual African food product from concept through product definition, design, development, testing and launch on iOS and Android.
- Owned product scope and feature decisions alongside React Native development, backend architecture, UI/UX, QA and release management.
- Built and shipped the product independently, balancing user experience, technical constraints and release priorities across the full product lifecycle.

LEADERSHIP & GOVERNANCE EXPERIENCE

Founder, Programme & Technical Lead

Giiyo Tech | Cameroon | Mar 2024 to Present

- Lead multiple concurrent technical programmes and partnerships, coordinating external stakeholders, programme requirements, volunteers and delivery across multiple locations.
- Built programmes and systems that have reached more than 500 learners while managing priorities across technical, programme and partnership workstreams.

Cardano Delegated Representative

Cardano Community | Jan 2025 to Present

- Analyse governance actions and proposals, determine positions using available evidence and communicate voting rationale on behalf of 55 delegators representing approximately 600,000 ADA.

Cardano Constitutional Delegate for Cameroon

2024

- Represented Cameroon at the Global Constitutional Convention alongside participants from more than 30 countries, contributing to discussion, drafting and negotiation of the first Cardano Constitution.

Cardano Future Workstreams & Definitions

Dec 2024 to Apr 2025

- Elected contributor to decentralised governance design and co-author of sections of the Community Constitution definitions work.

CORE SKILLS

Product & Analysis: Problem framing, requirements analysis, proposal review, stakeholder synthesis, prioritisation, technical product ownership, cross functional delivery, decision documentation

Open Standards & GitHub: CIP/CPS process, GitHub, pull requests, Git, Markdown, review workflows, issue discussion, technical proposal review

Research & Communication: Stakeholder interviews, qualitative synthesis, technical writing, async documentation, governance research, presentations

AI Workflows: AI assisted research, summarisation, drafting, synthesis, prompt development, workflow improvement

Engineering: JavaScript, TypeScript, React.js, React Native, Node.js, Supabase, HTML, CSS

EDUCATION

Bachelor of Science, Public Administration

University of Buea | Aug 2019 to Dec 2022

Software Engineering Training

Datagirls Technology | Buea
