I build software products and contribute to open technical standards and decentralised governance. My Cardano work spans authorship, research and on-chain representation.

01 Standards & governance.

CARDANO PROBLEM STATEMENT

CPS
0033

CO-AUTHOR · MERGED · 2026

CPS-0033 / TOOLS

DRep Voting Power Concentration

I co-authored CPS-0033, defining the technical problem of concentrated DRep voting power, drawing on governance research, community discussion and findings from the Cardano State of Governance Report 2026.

Through a **29-commit review cycle**, I responded to editor feedback and substantially reframed the statement around ledger rules, CIP-0119 metadata, and wallet and explorer behaviour.

Public review covered scope, admissibility, structure, references and Markdown before triage and merge into the Cardano CIPs repository.

Sep 2025 — Present
Remote

Community Governance Research Consultant
Input Output Global (IOG)

Contribute to Cardano governance research through the Beyond Minimum Viable Governance initiative, synthesising stakeholder interviews, workshops, surveys and on-chain data into structured findings and governance measurement priorities.

Jan 2025 — Present
Remote

Cardano Delegated Representative (DRep)
Cardano Community

I analyse governance actions, cast on-chain votes on behalf of 55 delegators, and communicate the reasoning behind those decisions.

ALSO

Cardano Constitutional Delegate for Cameroon, 2024 — represented Cameroon at the Global Constitutional Convention alongside participants from 30+ countries, contributing to drafting, negotiation and signing of the first Cardano Constitution.

02 Professional experience

Mar 2024 — Present
Cameroon

Founder

Giiyo Tech · giiyotech.com

Founded and lead a STEM education nonprofit. I coordinate technical programmes, curriculum, partnerships and volunteers, bringing hands-on robotics and coding to 500+ learners across Cameroon.

Jan 2023 — Dec 2024
Douala, Cameroon

Lead Developer & Project Manager

Maxwell Technologies

Led client-facing software delivery for a 12-person engineering team, translating business requirements into technical specifications and coordinating review and delivery across concurrent projects. Also facilitated online software engineering training for students.

INDEPENDENT PRODUCT / 2026 — PRESENT

Koki — Founder & Developer

Built and shipped a bilingual, offline-first African recipe app on iOS and Android, using React Native with a Supabase and Node.js backend.
