

WEPNGONG MAUREEN

SOFTWARE ENGINEER | CARDANO STANDARDS & GOVERNANCE CONTRIBUTOR

Douala, Cameroon | +237 670 199 687 | maureen@giiyotech.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software engineer and Cardano standards/governance contributor with hands-on experience in the CIP/CPS process, technical writing, public GitHub review, and cross-stakeholder discussion. Co-authored CPS-0033: DRep Voting Power Concentration and worked through the repository review cycle from editor feedback and substantive technical reframing through iterative commits, triage, review, and merge. Brings full-stack and mobile development experience, governance research, on-chain proposal analysis, and a strong track record of translating complex technical and community concerns into clear, reviewable documents.

CARDANO STANDARDS & GOVERNANCE EXPERIENCE

CPS-0033: DRep Voting Power Concentration | Co-author

2026

[Cardano Improvement Proposals repository](#) | [CPS-0033](#) | [PR #1211](#)

- Co-authored a formal Cardano Problem Statement defining the technical problem of DRep voting power concentration; the document is published in the CIPs repository as CPS-0033 in the Tools category.
- Worked through PR #1211 across a 29-commit review cycle, responding to editor feedback and substantially revising the proposal to focus on ledger rules, CIP-0119 metadata standards, wallet and explorer behaviour, and related technical mechanisms.
- Participated in public repository discussion and review, addressing admissibility, scope, document structure, references, Markdown formatting, and standards-process feedback before the proposal was triaged and merged.
- Developed the problem statement from governance research, stakeholder interviews, workshops, and wider ecosystem discussion, turning broad concerns into a standards-level problem definition.

Community Governance Research Consultant (Contract)

Sep 2025 - Present

[Input Output Global \(IOG\)](#) | Remote

- Contribute to Cardano governance research, including the State of Governance work, by synthesising community interviews, workshops, surveys, and on-chain data into ecosystem findings and measurement priorities.
- Conduct stakeholder interviews and translate qualitative and quantitative findings into structured analysis for technical and governance audiences.

Cardano Delegated Representative (DRep)

Jan 2025 - Present

[Cardano Community](#) | Remote

- Analyse governance actions and proposals and cast on-chain votes on behalf of 47 delegators representing approximately 600,000 ADA, while communicating voting rationale and representing community interests.

ADDITIONAL CARDANO LEADERSHIP

Cardano Constitutional Delegate for Cameroon

2024

[Global Constitutional Convention](#)

- Represented Cameroon alongside participants from 30+ countries and contributed to discussion, drafting, negotiation, and signing of the first Cardano Constitution.

Cardano Community Governance Contributor

Dec 2024 - Apr 2025

[Cardano Future Workstreams and Definitions](#)

- Elected to contribute to decentralised governance design for the Cardano treasury and co-authored sections of the Cardano Community Constitution definitions work.

TECHNICAL & LEADERSHIP EXPERIENCE

Founder | Programme & Technical Lead

Mar 2024 - Present

[Giiyo Tech](#) | Cameroon | giiyotech.com

- Founded and lead a youth-focused STEM education nonprofit, coordinating technical programmes, partnerships, curriculum, volunteers, and external stakeholders across multiple locations.
- Expanded hands-on technology programmes to reach 500+ learners across Cameroon through robotics, coding, workshops, and school-based STEM activities.

Lead Developer | Project Manager

Jan 2023 - Dec 2024

[Maxwell Technologies](#) | Douala, Cameroon

- Led client-facing software delivery, translating business requirements into technical work and coordinating priorities across an 8-person engineering team.
- Delivered 12 revenue-generating applications valued at \$180,000, while improving delivery time by 25% and code quality by 30%.

Koki | Founder & Independent Developer

2026 - Present

[Bilingual offline-first mobile application](#) | kokiafrique.com

- Independently designed, built, tested, and shipped a bilingual African recipe application from concept to production on iOS and Android.
- Owned React Native frontend development, Supabase and Node.js backend work, database architecture, UI/UX, QA, app-store deployment, and website delivery.

Software Engineer

Jun 2022 - Apr 2023

[Zinger Systems](#) | Buea, Cameroon

- Built responsive applications using JavaScript, React.js, WordPress, HTML5, and CSS across client projects, with responsibility for implementation, testing, and performance improvements.

CORE SKILLS

Standards & Repository: CIP/CPS process; Git; GitHub; pull requests; Markdown; review workflows; technical writing; requirements analysis; issue and review discussion

Software: JavaScript/TypeScript; React.js; React Native; Node.js; Supabase; WordPress; HTML/CSS; responsive web development

Cardano & Web3: Cardano governance; DRep governance; on-chain proposal analysis; stake delegation; governance research; ecosystem coordination

Collaboration: Stakeholder interviews; consensus facilitation; cross-functional coordination; public technical discussion; presentations; project management

EDUCATION & TECHNICAL TRAINING

Bachelor of Science (BSc), Public Administration

Aug 2019 - Dec 2022

[University of Buea](#) | Cameroon

Software Engineering Training

[Datagirls Technology](#) | Buea, Cameroon

Selected standards contribution: CPS-0033 - DRep Voting Power Concentration
